PREFACE.

THE Ritual adopted by the Modern Order of Essenes is so long that it can only be learned and retained by constant attendance at the meetings, and as many are so situated that they cannot regularly attend, they soon forget much that they have learned, and thus lose interest in the subject, until their connection with the Order becomes merely nominal, or is entirely severed in default of the payment of dues.

From this state of things arises the need and demand for some means of refreshing and aiding the memory, outside of the , and for the want of an authentic work on the subject, Essenes are availing them-

selves of any means of information that comes within their reach ; hence the extensive sale of several open and highly erroneous exposés, that are sold alike to members of the Order and the *public at large*. To arrest this evil, and meet the demand for a work that is both accurate and legitimate, this volume has been prepared.

THE AUTHOR.

NEW YORK, 1870.

THE ANCIENT ESSENES.—ORIGIN OF THE ORDER.

ESSENE from the Hebrew root, עָשָׂן (Esan, to be strong), עֲשֵׂינִי (Essene) because they exhibited strength of mind, in enduring suffering, and in subduing the passions; the Essenes* were an order of the Jews, and the fact that they developed themselves gradually, and at first imperceptibly, through intensifying the prevalent religious doctrines, renders it impossible to say precisely at what time they were detached from the general body. Josephus, however, speaks of them as existing in the days of Jonathan the Maccabæan, B.C. 143 (Ant. xiii. 5-9); he also mentions an Essene who delivered a prophecy in the reign of Aristobulus I., B.C.

* See Josephus.—Kitto.

106 (War i. 3-5; Ant. xiii. 11-2), and as we find no reliable record of them previous to B.C. 150, that is doubtless very near the date of the origin of the Order.

When they ultimately withdrew from the rest of the Jewish nation, the majority of them settled in Samaria, along the Jordan, and the rest lived in scattered communities throughout Palestine.

Both Philo and Josephus mention them as being very numerous at this time.

They were divided into two classes—the first devoting themselves to a life of contemplation, and studying the mysteries of nature and revelation; the second engaging in some daily handicraft. They were ruled by a Rabban, assisted by a Rabbi and a Rab,* who were chosen by the whole body. In cases of trial, however, a majority was required to constitute a tribunal, and the brother who walked disorderly was

* Rabban, from the Hebrew רַבֵּן, master.

Rab, “ “ “ רַב, assistant teacher.

excommunicated ; yet he was not regarded as an enemy, but was admonished as a brother, and usually received back, after due repentance.

They divided the twenty-four hours into three parts : a portion of which was devoted to the service of God and the relief of the needy and distressed, a portion to their usual avocations, and a portion for refreshment and sleep.

They rose at early dawn, and offered up the national prayer for the return of the light of day, after which they betook themselves to their respective vocations and engagements, under the superintendence of the Rabbans and Overseers. At the sixth hour, or twelve o'clock, the labor of the forenoon terminated, and all reassembled, bathed in cold water, after which they put on their white garments, entered their refectory with as much solemnity as if it were the Holy Temple, and sat down together in mysterious silence to the common meal. When seated, the priest invoked God's blessing upon the repast, after which the baker

placed before each one a small loaf of bread, and the cook a dish of plain food. At the conclusion of the meal the priest offered up thanks to the Bountiful Supplier of all our wants. This was the signal of their dismissal, when they withdrew, put off their white garments, and resumed labor again until the eleventh hour (or five o'clock, as we reckon time). On the Sabbath they assembled in the synagogues, where they were seated according to their age, the younger sitting below the elder in becoming attire, and listening with due attention. Then one takes up the Sacred Volume and reads a portion, whilst a Rabbi expounds.

But as they were completely esoteric in their doctrines, they omitted the most mysterious portions, which were only taught in the Hadoth,* or place of secret meetings.

As a sect they were distinguished by an aspiration after purity, and, like the Chasidim of earlier times, were confounded in

* Hadoth, from the Hebrew הַדוֹת, a place of secret meeting, or meeting by appointment.

the popular estimation with the great body of the zealous observers of the law. The growth of Essenism was a natural result of the religious feeling which was called out by the circumstances of the Greek dominion, and it is easy to trace the process by which it was matured.

From the Maccabæan age there was a continuous effort among the stricter Jews to attain an absolute standard of Holiness. Each class of devotees was looked upon as practically impure by their successors, who carried the laws of purity still further; and the Essenes stood at the extreme limit of the mystic asceticism, which was thus gradually reduced to shape.

As an Order they were distinguished by the following principles and observances:—

A love of truth and sobriety; love to God and man, made manifest by religious zeal and kindly acts towards each other; always aiding the needy—and to this end they had stewards in every place where they dwelt, to supply needy brethren

with food and raiment, and as a means of recognition they had certain signs and pass-words, by which they presently recognized each other.

They were divided into three grades, or ranks, and when a candidate applied for admission his character was scrutinized with the greatest severity, and if found worthy, he was admitted to the first grade, when he was presented with a white garment and girdle. He then remained in a state of probation and trial for one year, during which time, although he lived according to their customs, he was not admitted to their secret meetings. At the termination of this period he was advanced to the second rank, with its consequent rights and privileges; but he was not admitted to full fellowship with them until after another year of probation, when, if still found worthy, he was advanced to the third rank, and invested with all of the signs, pass-words, and privileges of the Order.

On his admission he was required to

take upon himself a solemn oath or obligation, the heads of which were as follows:—

To exercise piety towards God and justice towards men; to shun the wicked and emulate the good; to show fidelity and obedience to those in authority; to be a lover of truth and a reprover of falsehood; to keep his hands clean from theft, and his soul from unlawful gains; to conceal nothing from the Order, nor disclose any of their secrets to any one in any other manner than he received them himself; and, lastly, to carefully guard and preserve the Sacred Books and Symbols belonging to the Order.

MODERN ESSENISM.

On the revival of Essenism and its introduction into this country, the principles of the ancient sect were adopted by the new Order here as a basis of their creed and government, together with the following Ritual,* which is here given to *assist* us

* While the modern order has retained the name (Essenes) and principles of the ancient sect, still it

in *becoming bright* and zealous workers on that symbolic structure here below, to the end that we all may be the better enabled to eventually enter that Spiritual Building—that House not made with hands, eternal in the heavens.

Now, as in the ancient time, the candidate for admission to the Order has to pass through a novitiate of two stages of twelve months each.

On his admission to the first grade, the following rites and ceremonies are observed:—

First. The Rabban ascends the daïs and calls the brethren to order, and commands the Rab to see that all of the approaches to the Hadoth are duly guarded, so that the profane may not gain admission.

Then the Rabbi invokes the blessing of

was found necessary to materially modify the ritual, in order to adapt it to the present state of civilization. The rites and ceremonies of this Order likewise essentially differ from those practised by a society of Essenes in this country, who are strictly a religious sect.

Deity on their labors (during which time all in reverence bow), and closes with Amen, to which all respond, Amen. So mote it be.

After which the Rabban thus addresses the Sawái:—

RABBAN.—Br. Sawái.

SAWÁI.—Wfl. Rabban.

RABBAN.—Where did our ancient brethren meet?

Sw.—In Synagogues and in the Hadoth, or place of secret meeting.

RABBAN.—What was the manner of teaching among Ancient Essenes?

Sw.—They taught their more important doctrines in secret, and philosophized on most things in symbols.

RABBAN.—Where do Essenes meet at the present day?

Sw.*—In the Hadoth.

* Many of the words in this Ritual have been abbreviated. This has been done for two reasons. First, to present the subject in as condensed and convenient a form as possible. Second, as it renders the reading somewhat difficult, it will the better *fix the various rites and ceremonies in the memory.*

RABBAN.—How do we illustrate the important truths prtning to our detr'ns?

Sw.—By symbols.

RABBAN.—Why are we assembled to-night?

Sw.—It was the custom among Ancient Essenes to meet at regular and stated periods for instruction, also to initiate candidates into the msts. of Essenism. We are thus assembled to-night.

RABBAN.—How many const't a quorum in the Hadoth?

Sw.—Nine or more.

RABBAN.—When empsd. of nine, of whom do they consist?

Sw.—The Rabban, Rabbi, Rab, Sawái, Jawái, Sadáin, Jadáin, S. M. C., and J. M. C.

RABBAN.—Have we a quorum to-night?

Sw.—I will call the roll of officers and ascertain (calls the roll). We have a quorum, Wfl.

SUCCOTH.

When the Patriarch Jacob was on his way from Peniel to Shechem, he made booths for shelter during a halt in the Jordan valley, which gave the name to the place—Succoth (booths). In the distribution among the Tribes, Succoth fell to the Tribe of Gad, and was therefore on the East side of the Jordan.

The people refused to assist Gideon on his pursuit of the Midianite Sheiks Zebah and Zalmunna, and 77 of their chief rulers were killed by him on his return. (Judges viii.)

The vessels of the Temple were cast in the clay grounds between Succoth

and Zeredathah ;* this place was not far from Jericho, in the valley of the Jordan (*Kikkar*). The deep clay banks are well adapted for moulding and casting large and fine work, and the clay is now carried away for such purposes to Jerusalem and other cities.

The view is in the valley of Jordan, looking South towards the Dead Sea, from a point a few miles North of Jericho, where Zarthan is now located, at the hill of Kurn Surtabeh.

* 2 Chron., iv. 17, Zeredathah.

1 Kings, vii. 46, Zarthan.

L'GIC

Is that scine whh drets us hw t' form cler an' dstinct ides of things, and thrby prvnts u's fm bng msled by their simlitud or rsemblnc of all the human scines. That enernng man is crtnly mst wrthy of the humn mnd, and the prpr mnr of endctng its several pwrs in the attainmt of trth and knowldg.

This science ought to be cultivated as a foundation or ground-work of our inquiries; particularly in the pursuit of these sublime principles which claim our attention as Essences.

ARITHMETIC

Is the art of numbering, or that part of mathematics which considers the properties of numbers in general. We have but a very imperfect idea of things without quantity, and as imperfect of quantity itself, without the help of arithmetic. All the works of the Almighty are made in number, weight, and measure; therefore, to understand them rightly we ought to understand arithmetical calculations; and the greater the advancement we make in the mathematical sciences, the more capable will we be of considering such things as are the ordinary objects of our conceptions, and be thereby led to a more comprehensive knowledge of our great Creator, and the works of the Creation.

GEOMETRY

Treats of the powers and properties of magnitudes in general, where length, breadth, and thickness are considered from a point to a line, from a line to a

suprfic, and fm a suprfic to a sol'd. A pnt is the bgning o' all gmtrel mtter. A ln is a cntinutn o' th sme. A suprfc is lnth an' bredth wthout a gvn thkns. A sol'd is lenth and bredth, wth a gven thkns, wh frms a c'be, and cmprehnds th whol.

THE ESSENES' GATE.

The importance and influence of the Order of Essenes is seen in the fact of a gate of the city of Jerusalem being named after them.

THE GATE OF THE ESSENES (described by Josephus, Wars, v. iv.; 2) was on Zion, as you go south from the present Zion gate, following the path around the tomb of David. A slight depression of the ground is perceptible near the brow of the hill looking south towards the valley of Hinnom; at this spot was the Gate of the Essenes. There are no ruins above ground, and no relics of any kind remaining from which to form an idea of its appearance.

THE GATES OF THE TEMPLE.*

THE SOUTH GATE.

In the south wall of the Temple area is a double gate, now walled up, and called the Huldah Gate (from the Talmud). This is built of very large stones, especially inside, and has an entrance hall 50 feet long by 40 wide, leading to a passage (by a flight of nine stone steps) 250 feet long, which (by another flight of three steps) conducts to the area above.

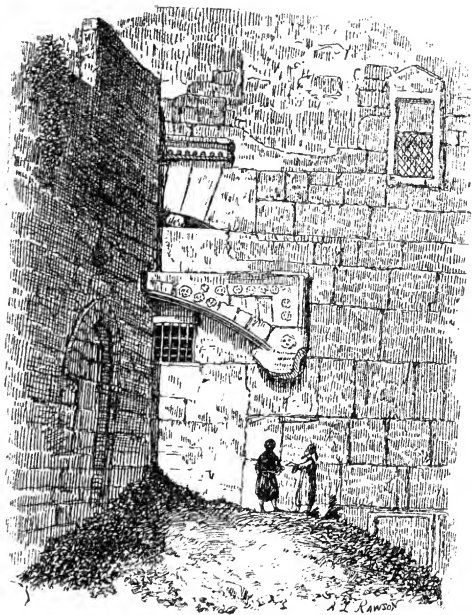

In the centre of the entrance hall there is a column formed of a single block of marble, which supports the spring of four arches (on which rest four domes); the height is 21 feet, and the diameter 6 feet and 3 inches. There is no monument of antiquity in Jerusalem that is more interesting than this relic of the Jewish builders of the days of Solomon.

* The works of the following scholars and travellers may be referred to on this subject:

City of the Great King. Dr. Barclay.

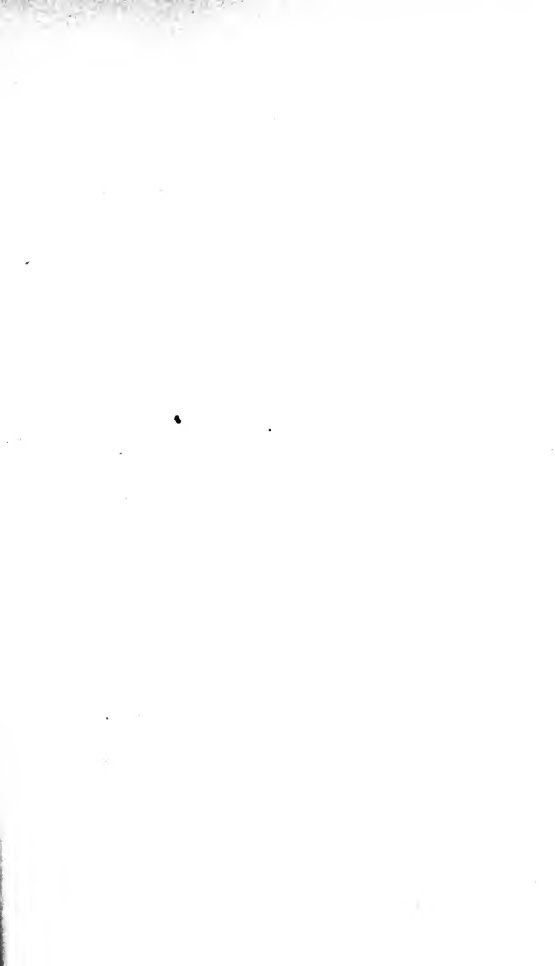

Robinson's Biblical Researches, and

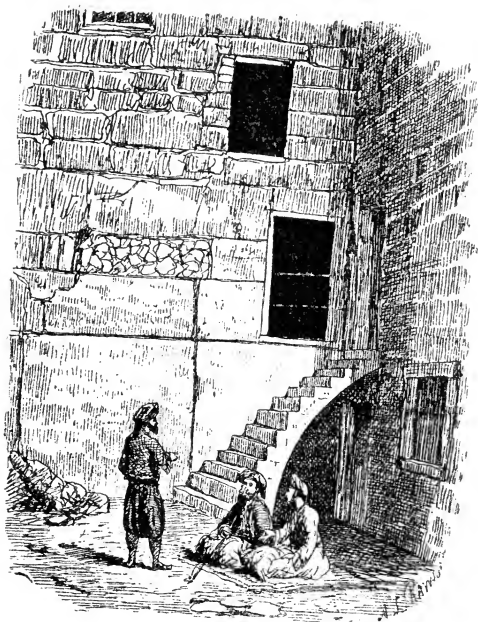

Rawson's Bible Hand-book.

SOUTH GATE.

WEST GATE.

THE WEST GATE.

A few years since, Dr. Barclay (City of the Great King, page 489) discovered, after it had been hidden by rubbish and buildings, the west gate of the Temple. The engraving shows only a part of the lintel of this gate, and only this much can be seen, for the authorities have not yet permitted a further examination of the place. The stone shown measures 20 feet long by 6 feet 9 inches thick. The Temple site, about twenty feet above the inside of the gateway, is occupied by modern buildings, which hide nearly all the ancient work, only leaving bare the arched top and edge of the lintel.

THE EAST GATE.

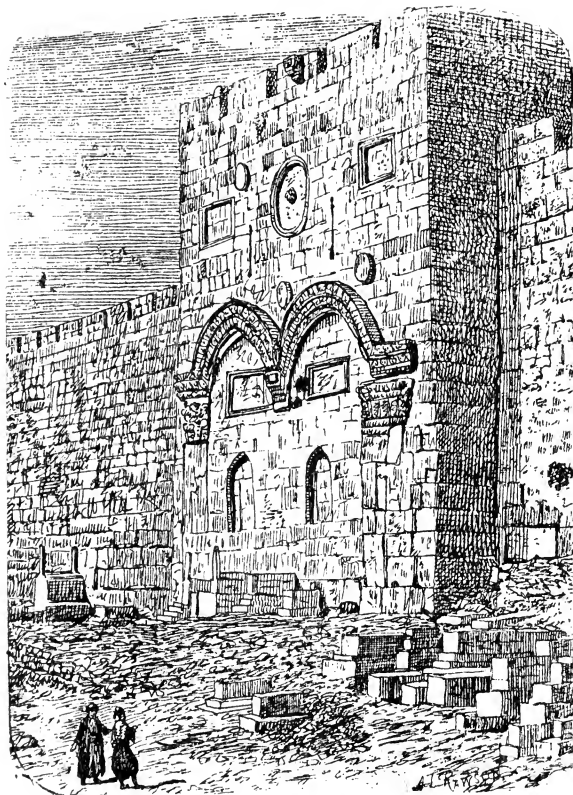

The entrance to the Temple enclosure on the east is now walled up and kept closed by the Mohammedans, because of a superstitious fear that the Christians will enter the city by that gate and drive them out.

The style is ancient, and its interior is ornamented with rich and elaborate carvings in the Grecian style.

The length is 70 feet, and breadth 55, and it projects 6 feet beyond the wall; two columns divide it into a double arcade, lighted at the west end by two domes. The effect is grand and imposing.

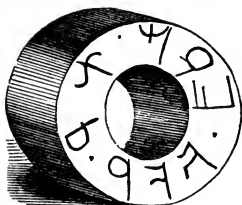

The columns are formed out of a single block of marble, and the walls are eleven feet thick. A grand stairway of massive stone blocks leads from the gate up to the platform, which is 25 feet above.

The Crusaders called this the GOLDEN GATE (Porta Aurea).

EAST GATE.

ANCIENT TALENT.*

The Talent was a denomination or weight of gold, silver, or copper, usually of a circular form. At the time of the building of the Temple its weight and value was as follows:

† The Hebrew Gold Talent weighed...	1,320,000	grs.
“ “ Silver “ “	660,000	“
“ Persian Gold “ “	400,000	“
“ Babylonian Silver Talent weighed	959,000	“
(“ American Gold Dollar, coinage of 1855.....	25.8	“)

* The Talent (תַּלְתָּל) means a circle or globe, here denoting a circular mass of metal, or aggregate sum.

† See Kitto—Smith's Dictionary of the Bible, and Rawson's Bible Hand-book.

In case of the death, inability, or absence of the Wr., or a vacancy in his office, the S. and J. W.ns will in succession succeed to his prerogatives and duties for all purposes ; and in case of the absence of either of the W.ns. the Wr., will appoint some one to temporarily fill his place.
